## EARLY ORDER

2018 Plow & Wing Shoes to MDOT's, Counties, Villages and Cities

**Pricing available until July 10, 2018.**

Hardened shoes are manufactured with class 40 gray iron, modified with chrome to increase strength and wear life. The wing shoes are designed to be used with either a flat square edge or reverse curve blades. Brinell hardness is 235-245. We also have an advanced-updated wing shoe that has been available and used successfully. The ni-hard is manufactured with the same shape but with white iron which increase the wear life. After testing, with a few counties, it has been found to have extended the life by 50-100%.
